

ARCHIVE INNOVATION

Unlock Your Archive's Potential
with Advanced Archiving Tech

Presented by Jean-Christophe Kummer, NOA CEO,
during „Meet the sponsors“ session at FIAT/IFTA's 2024 world conference.

since
2000

carrier digitization and signal transfer

5.000.000+ hours of material digitized worldwide with NOA solutions

since
2000

carrier management and logistics

10.000+ carriers moved per day

since
2016

file and signal quality gate

100% of NOA customers build their workflows around quality gates

since
2000

advanced metadata management

4.000.000+ - 18.000.000 metadata items managed per installation worldwide

GERMAN ENGINEERING
& AUSTRIAN HEART

Our mission:

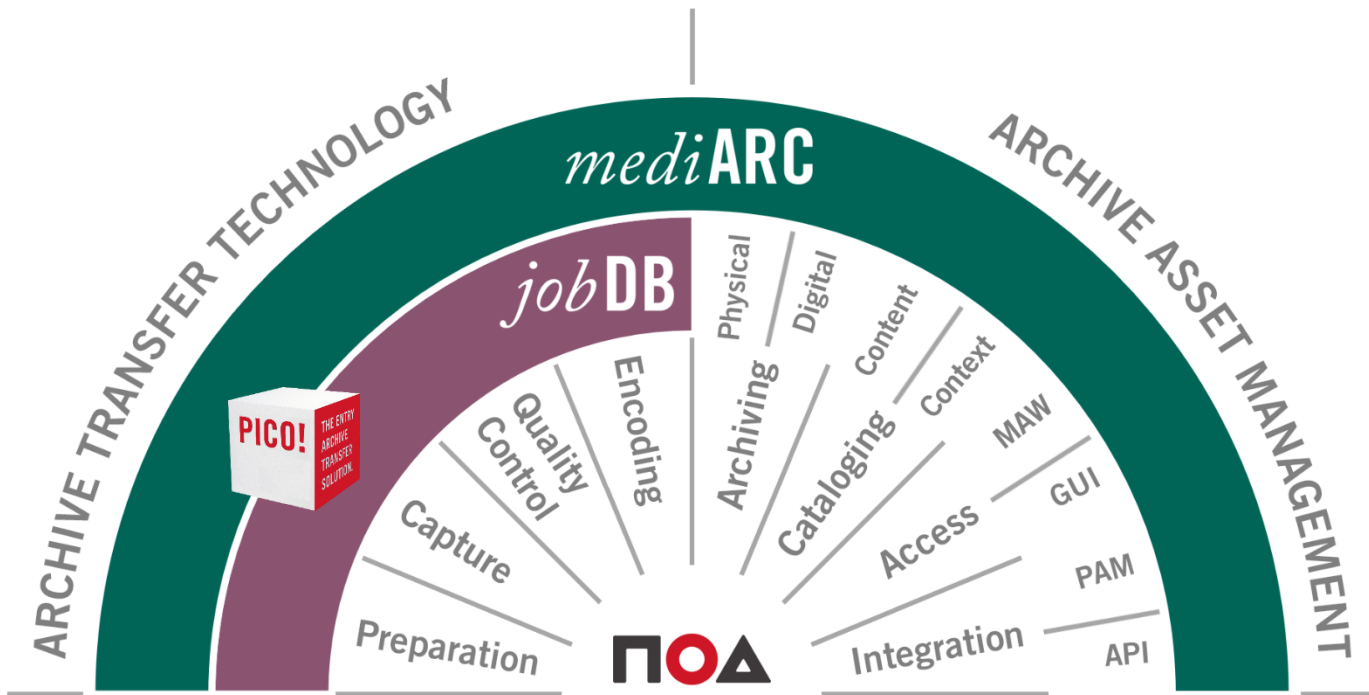

*"To help humanity preserve &
enjoy culture for eternity +1 day!"*

since
2000

project and process design for clients

10.000 active users worldwide

single station ingest systems for audio and video carriers

quality-oriented and task-driven approach even at small scales

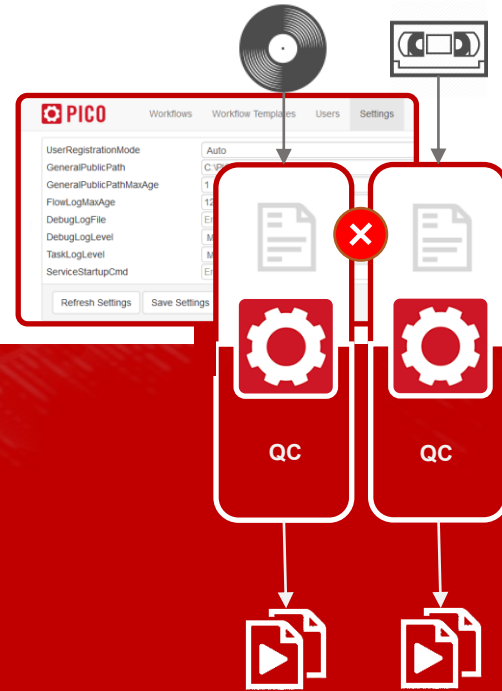

customizable workflows for digitization and transcoding

ideal for ingest and processing of small carrier batches

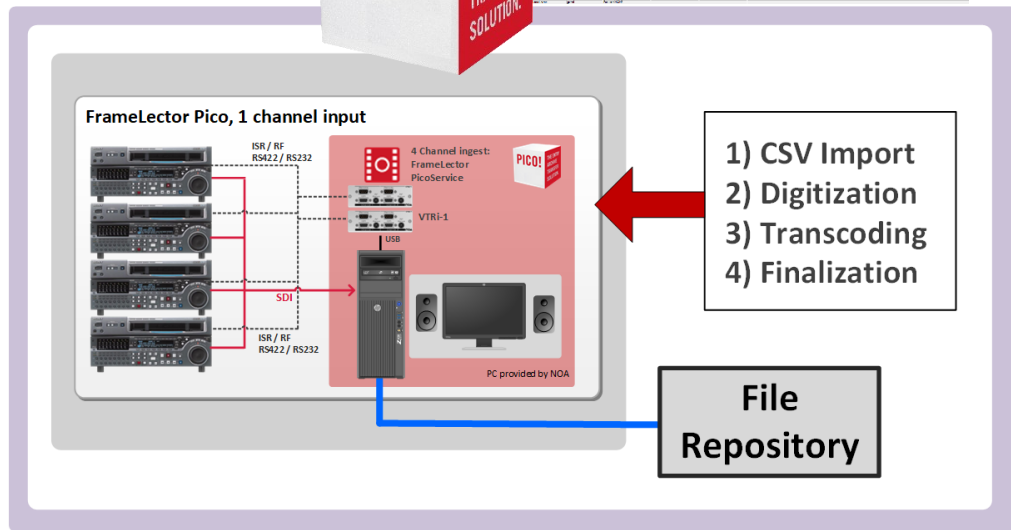

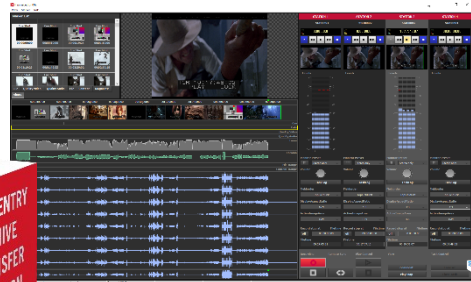

low-cost and on-demand add-on to existing projects

True Video Audio Archive Facsimile Creation – Ingest in the Corner – Single Station

- Single station ingest system – STAND ALONE
- 4 VTR Streams in parallel
- Mathematically Lossless Open Source Recording FFvHUFF, FFv1.3
- RF and ISR Read Out
- Transfer Quality Control
- Runs on COTS hardware – Software deployed system
- Small hardware interface to read out Machine Signals
- All tasks are done locally:
 - Mathematically lossless recording
 - Transcoding to IMX50, DV50, LoRes
 - Finalization

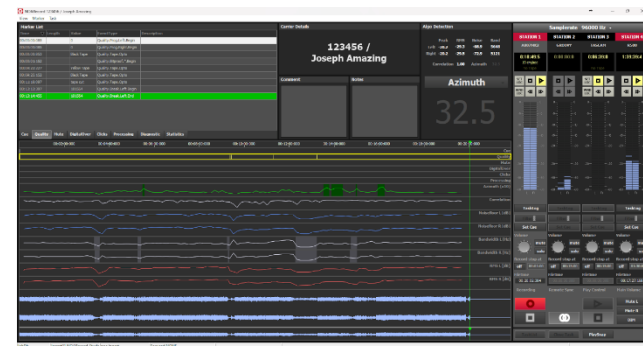

ingestLINE™ PICO

NOA Record PICO any 4 ATR Machines

True Audio Archive Facsimile Creation – Ingest in the Corner

- Single station ingest system – STAND ALONE
- BWF EBU3285 – 96/24 archive file creation
- FOUR simultaneous streams
- BitProof™ guarantees authentic facsimile
- Various historic de-emphasis filter curves
- N7000c ADC with > 122dB Dynamic
- Individual workflow templates
- Individual finalization scenarios with easy connection to 3rd party tools
- Easy to set up, easy to use
- Low entry hurdle
- Upgradeable to a digitization facility!

workflow system for large-scale audio and video digitization projects

collaborative workflows for high-efficiency, high-throughput setups

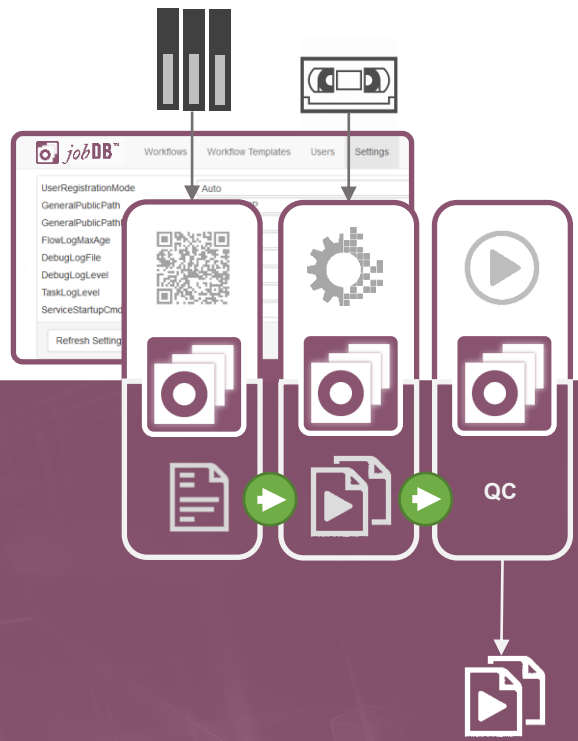

inventory, carrier logistics, quality control, digitization, simple annotation, delivery to MAM systems

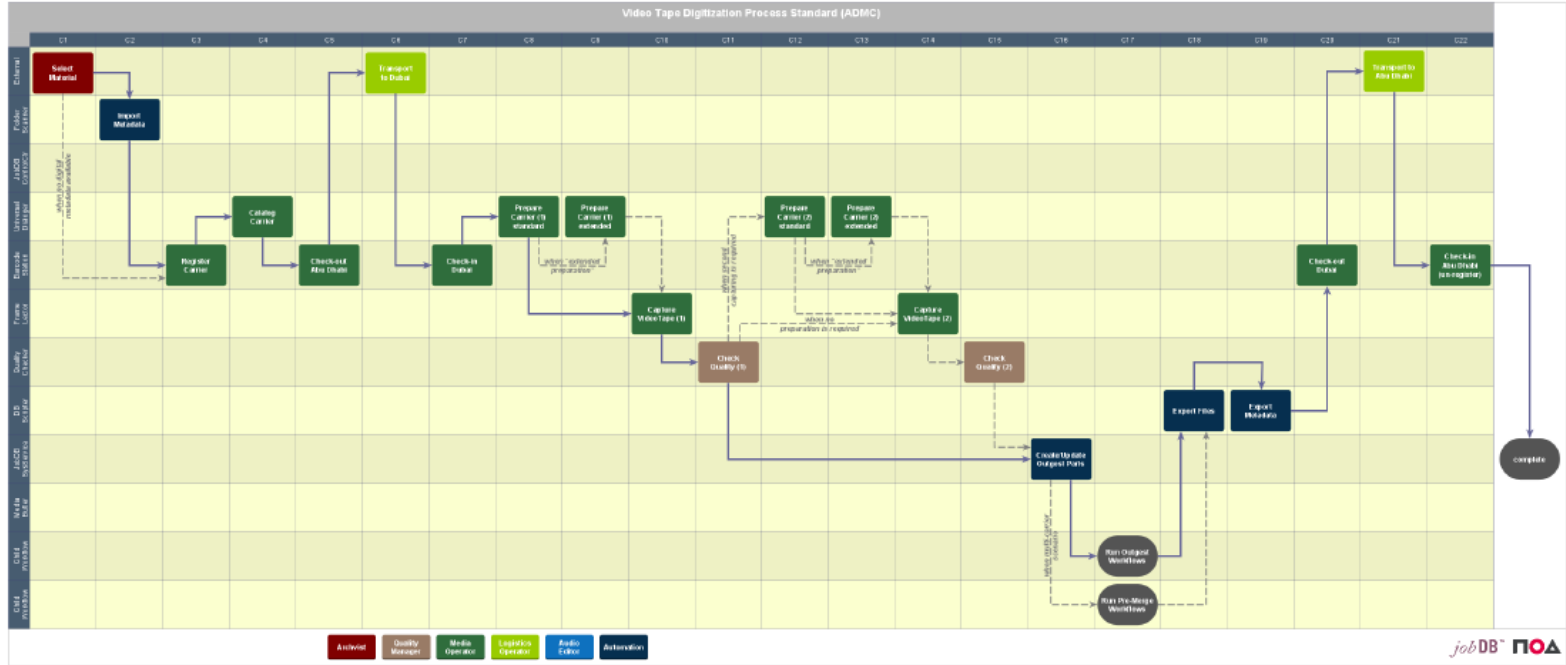

wide range of professional tools to drive logistics, digitize carriers, process media files, verify quality, and much more

seamless API integration with 3rd party archive ecosystems and MAMs

Ingest Workflow

Ingest Workflow

ORF

600,000 carriers
Advanced **logistics**
4 levels of **QC**
Destruction of tapes

110,000 carriers
Special workflows for analog captures
Satellite capture workstation in regions
IP based processing

60,000 carriers
Special workflows for analog captures
Start: Q4/2024
IP based processing

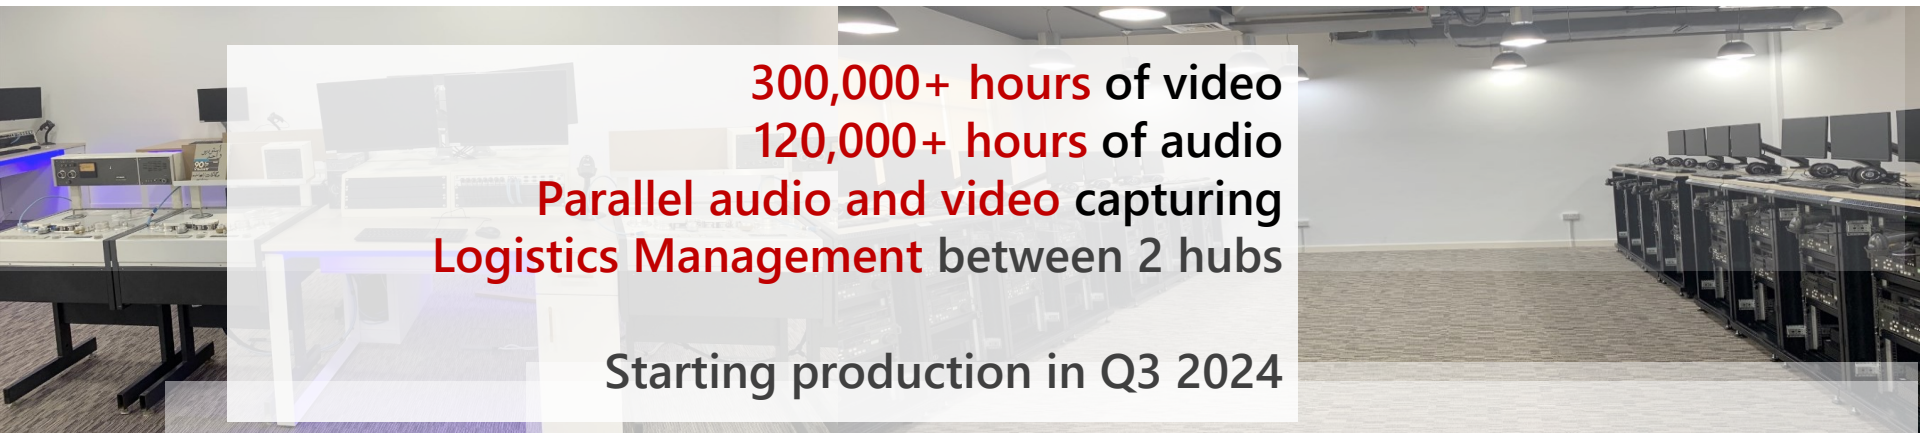

NOA develops archiving products and services
for a wide **variety of business domains**

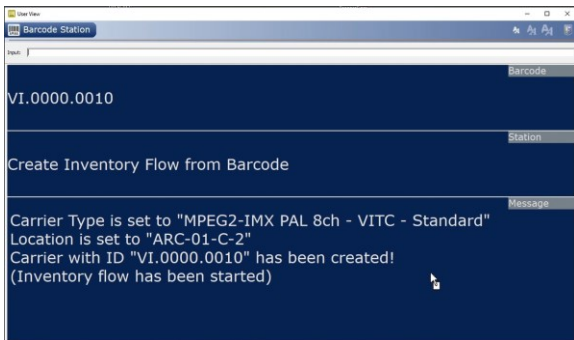

ADMC

National Broadcaster, Abu Dhabi, UAE

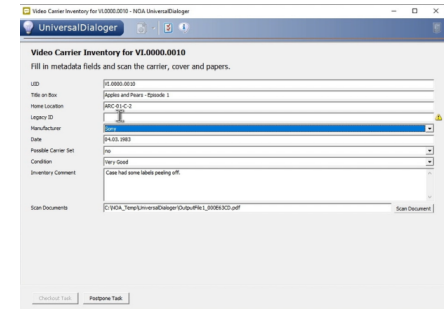

300,000+ hours of video
120,000+ hours of audio
Parallel audio and video capturing
Logistics Management between 2 hubs
 Starting production in Q3 2024

Inventory and Logistics Handling

Inventory with NOA UniversalDialoger

- Unambiguous labeling
- Simple metadata capturing
- Scanning of tandem materials
- First inspection (mold, dirt, etc.)

Logistics with NOA BarcodeStation

- Preparing batches to be sent to preservation factory in Dubai
- Grouping batches and combining to large batches
- Archive check out in Abu Dhabi
- Transport
- Check-in at Dubai preservation factory

Audio & Video Preparation Workstations

PREPARATION with NOA UniversalDialoger

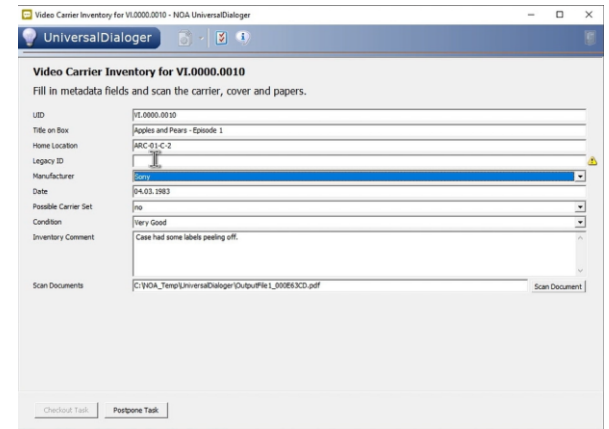

Audio:

- Mold and debris cleaning
- Baking
- Multi winding to reduce print through effect
- Adding leader tape
- Repairing splices
- All steps logged with NOA UniversalDialoger

Video:

- Baking
- Cleaning with different

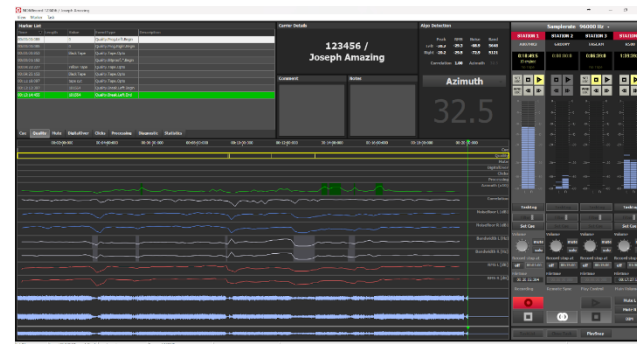

Ingest Audio Area

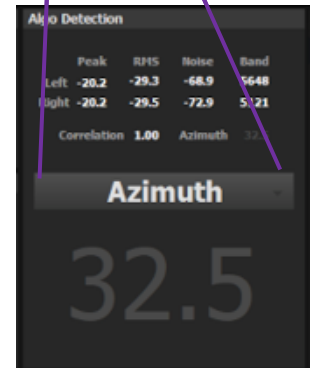

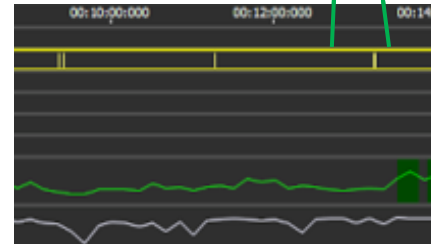

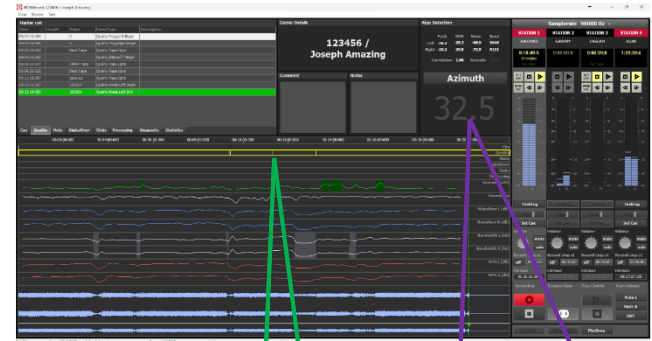

Ingest Audio with NOARecord

- Monitoring of all transfer relevant quality parameters
- Bandwidth, azimuth, correlation, tape condition, clicks, mutes, silence, etc.
- Indication of problematic areas

Ingest Audio Area

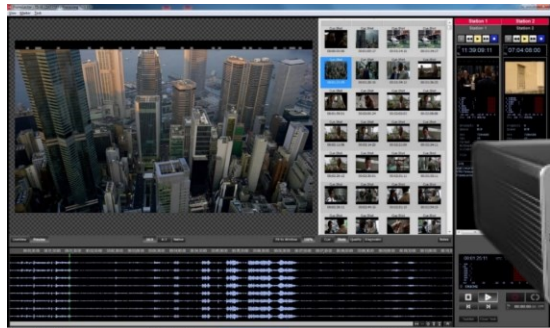

Ingest Video Area

Ingest Video with NOA FrameLector

- 1-2 channels of SD-video transfer (8ch audio)
- Automatic shot detection
- VTR remote control
- Mathematically lossless working format
- Transfer quality control:
 - RF traces & ISR events logging

Time	Value	Event Type	Description
00:00:07:07	4	Quality_Condition.Video	10:02:01:09
00:00:08:03	4	Quality_Condition.Audio	10:02:02:05
00:00:08:17	4	Quality_Condition.Video	10:02:02:19
00:00:32:00	4	Quality_Condition.Video	10:02:26:02
00:06:07:15	4	Quality_Condition.Video	10:08:00:21

Subject: Last Time Buy Notice for Drum Refurbishment

Dear:

I hope this message finds you well. We want to take this opportunity to express our appreciation for your partnership and the mutual success we have enjoyed

We are writing to inform you that we will be discontinuing drum refurbishment services at AheadTek. We believe that addressing these matters promptly will be beneficial for both parties.

To support you during this transition, we are offering a Last Time Buy opportunity for drum refurbishment. Please let us know if there are any need for refurbishment services.

We are committed to ensuring a smooth transition and will be happy to assist in any way we can.

Thank you for your attention to this matter.

Best regards,

Huy Nguyen
CEO

Obsolency

- AheadTek announces last call for drum refurbishments.
- Umatic, 1" B at highest risks (not enough machines there)

Still working a few years:

- Betacam
- DigiBeta
- DV –

What will always be possible:

- Film
- Sound (HiFi 1/4" market growing)
